Norian:

- Norian SRS
- Norian SRS is an used in stable bo AO orthopedic te carbonated apati
- Key Features & B
- Isothermic harde
- Hardens in appro need to control r
- Cures to a maxim
- Provides an ostec during the healin
- Indications
- Intended only for the bony structur
- Intended for trea

hat should be using standard /o to form phase of bone.

ISSUE t, reducing the hours with bone

e stability of us defects

etting, biocompatible material defects which have been stabilized implants. Norian SRS Fast Set te, a composition closely

to the surrounding tissue rm, wet environment, reducing te

es operating time $\sim 30\text{MPa}$ within 24 hours bs and is replaced with bone

Indications

- Intended only for bony voids or defects that are not intrinsic to the stability of the bony structure in the extremities and pelvis
- Intended for treatment of surgically or traumatically created osseous defects
